Meta Universe MEU

WHITEPAPER
Initial version –
June 2025.

ERC-20 Token on Ethereum
Blockchain.

Introduction

Meta Universe Token (MEU) is an ERC-20 token launched on the Ethereum blockchain, conceived as a seed of value with a long-term vision. There was no presale, no private investors, and no funds or liquidity were extracted from the project.
 The initial liquidity was fully provided by the creator, ensuring a transparent, open, and non-speculative approach.

Project Transparency

MEU is a 100% community-driven token.
 No profit promises, no misleading marketing, no risky structures.
 MEU is not a "pump & dump" or trend token: it is intended to grow organically with its community.
 All technical steps were performed directly by the creator with great care.

Launch Process

- **First attempt on V4 (June 19, 2025):**
   The first liquidity pool was created on Uniswap V4 with approximately $500 USD worth of ETH.
   Due to price adjustment issues (caused by inexperience with V4), this pool was later removed.
- **Second attempt on V3 (June 20, 2025):**
   The second liquidity pool was created on Uniswap V3 with an initial contribution of 0.40 ETH.

- **Final launch on V2 (June 27, 2025):**

   The final liquidity pool was with 1.27 ETH. (with a position value of aproximately $7,675.01 usd)

Since then, the pool has been operating publicly and transparently.
 Purchases and sales are progressing steadily.

No massive airdrops or token giveaways were performed.
The first holders arrived organically after confirming correct operation.

Tokenomics

- **Total Supply:** 1,000,000 MEU
- **Liquidity Pool:** Uniswap V2 — ETH / MEU
- **Creator Wallet:** 0x442bEF946DF830ea8f578aa9247bD712f5b70B3e
- **Contract Address:** 0x0eD1f8711fB75eF35069455f72fc9fA66630568B

Roadmap	Community

Roadmap

- **Phase 1 (Completed)**
  - Contract creation and verification.
  - First pool created and adjusted on Uniswap V2.
  - Initial official website published.
  - GitHub repository with README and transparency.
  - Automatically generated listing on DexScreener and geckoterminal.
- **Phase 2 (In progress)**
  - Official listing request on Etherscan (info, logo, metadata).
  - Creation of official Telegram / Discord channels.
  - Generation of Whitepaper (this document).
  - First community-building activities.
- **Phase 3 (Upcoming)**
  - Development of first utilities:
    - Using MEU as payment method in art and fashion projects.
    - Integration with NFT artistic and digital art commerce.
    - Creation of related NFT collections.
  - Growth of trading volume and holder base.
- **Phase 4 (Future)**
  - Potential partnerships with creators and businesses willing to accept MEU.
  - Expansion to other DeFi platforms.
  - Potential liquidity lock for additional security.
  - Submission for listings on major platforms (CoinGecko, CoinMarketCap).

Community

MEU is a token built from personal effort, transparency, and the goal of creating a small but genuine community.
 It is open to anyone wishing to participate, always with responsibility and a constructive mindset.
